Store Audit for WooCommerce

A free, read-only audit of your WooCommerce store: one button, a score from 0 to 100 and a plain-language list of findings. It never changes anything on your site.

- 49 checks: security, settings, environment, plugins and theme, performance
- A one-line fix for every finding
- Export as JSON, PDF or Markdown

Order Flow for WooCommerce

Your own order statuses, rules for who may move an order where, and the right email and PDF at every step. Every change is recorded on the order: who, when, and why.

- Custom statuses and role-based transition rules
- An email and a PDF document per status
- Full change history on every order

Product Sheet AI for WooCommerce

Turns a supplier sheet into a WooCommerce product draft: descriptions, attributes, variations, prices and SEO. Every field shows current vs proposed, and nothing is saved until you apply.

- Paste text or upload .txt, .csv or a text PDF
- Uses your existing attributes and categories
- Your own AI key, a cent or two per product
